TECH STACK

Data Science

Machine Learning, Deep Learning,
Exploratory Data Analysis,
Data Visualization.

Programming Languages

Python, Java

Web Development

React JS, HTML, CSS, JS

Databases

SQL – MY SQL, MS SQL

NO SQL - Mongo

AREAS OF EXPERTISE

Data Analytics, Machine Learning,
Deep Learning, Deployment

LANGUAGES KNOWN

English, Hindi, Telugu

PROFILE

Analytical, consistent, and enthusiastic data-drive professional with over **2+ years** of valuable experience with proficiency in machine learning & statistical modelling algorithms. Expertise in conducting **end-to-end lifecycle analysis** including data gathering, cleansing, & recommendations to optimize performance. I am passionate about building and applying algorithms to solve real-world industry problems

EMPLOYMENT HISTORY

Business Analyst at Genpact Pvt Ltd company, Bangalore, India

July 2022 — Present

- Machine Learning

- Experience using machine learning algorithms to optimize inventory levels and forecast demand.
- Proficient in programming languages such as Python and SQL for data analysis and modelling.
- Collaborated with cross-functional teams, including procurement, logistics, and operations, to drive process improvements and cost savings.
- Solid understanding of supply chain concepts, including demand forecasting, transportation management, and inventory control.
- Passionate about utilizing skills in machine learning and programming to drive process improvements and cost savings in the supply chain.
- Proven ability to effectively communicate data-driven insights to non-technical stakeholders to drive business decisions.

Junior Data Science Engineer at LogiQ Dreams LLP company, Kozhikode, India

December 2020 — June 2022

- AI & Web Development

- Experienced data science engineering focusing on identifying electrical appliances using machine learning techniques.
- Proficient in data pre-processing, feature extraction, and model training using Python and various machine learning libraries such as sci-kit-learn and TensorFlow.
- Developed and deployed models for identifying electrical appliances based on their power consumption and other features using techniques such as decision trees, random forests, and neural networks.
- Conducted extensive data analysis to identify patterns and correlations in electrical appliance usage, leading to insights that can be used for energy efficiency and cost savings.
- Collaborated with cross-functional teams, including product development, engineering, and business development, to translate insights from data analysis into actionable business strategies.
- Experience in data collection and pre-processing using IoT sensors and other data collection methods.

INTERNSHIP

Software Intern at PSquare Groups company, Andhra Pradesh, India

April 2018 — May 2018

Skills Earned: HTML, CSS, JS, PHP, SQL And Software Development Life Cycle.

Web Developer

- Proficient in web development technologies such as HTML, CSS, JavaScript, and PHP.
- Experienced in developing and maintaining websites and web applications, including database design and development using SQL.
- Familiar with version control systems like Git for code management and has worked on both front-end and back-end development. Collaborated with cross-functional teams to deliver high-quality web applications.

EDUCATION

BTech in Computer science engineering, Jawaharlal Nehru Technological University. Hyderabad, India

April 2015 — 2019

Projects:

1. **App Development:** A College Management System app is a software application that automates and streamlines administrative tasks in a college or university, such as student record keeping. It provides a centralized platform for faculty, staff, and students to access and manage academic and administrative information.
2. **Web Application:** An Online Examination system app is a software application that facilitates the creation, delivery, and grading of exams over the internet, providing remote access for students to take exams from anywhere at any time.

Projects

Created an end-end life cycle of ML & DL projects. Developed web applications with system design and latest technologies.

Tools & Frameworks: React JS, Django, Mongo, and Data Science projects.

Projects:

3. **Recipe Recommendation:** Uploading a picture of fruits, vegetables and meats it recognizes each objects in an image and recommends a recipe by different continental dishes and also provides the information of required ingredients. [Know More](#)
4. **Text Analysis:** Gathered 10k+ reviews on movies. Using NLP to achieve the sentiment analysis on each review how users are reacted positive or Negative by applying some statical and analytical techniques. [Know More](#)
5. **Machine Learning Models:** Using different data sets from various sources created a GitHub repository to contribute knowledge on various Machine Learning models with a data analysis and documentation. [Know More](#)

Certifications

1. **Java:** Completed java developer course from Udemy. [Certificate](#)
2. **UI Path Automation:** Certified in UI path automation. Developed an application by automating the search for tickets by bus, trains and flights websites. [Certificate](#)
3. **Salesforce:** Certified in Business Administration specialist in salesforce. [Certificate](#)
