CAREER OBJECTIVE

Analytical, consistent, and enthusiastic data-drive professional with over 3 years of valuable experience with proficiency in machine learning & statistical modelling algorithms. Expertise in conducting end-to-end lifecycle analysis including data gathering, cleansing, & recommendations to optimize performance. I am passionate about building and applying algorithms to solve real-world industry problems.

EMPLOYMENT HISTORY

Business Analyst at Genpact Pvt Ltd company, Bangalore, India

July 2022 — Present

- Machine Learning

- Experience using machine learning algorithms to optimize inventory levels and forecast demand.
- Proficient in programming languages such as Python and SQL for data analysis and modelling.
- Collaborated with cross-functional teams, including procurement, logistics, and operations, to drive process improvements and cost savings.
- Solid understanding of supply chain concepts, including demand forecasting, transportation management, and inventory control.
- Proven ability to effectively communicate data-driven insights to non-technical stakeholders to drive business decisions.

Junior Data Science Engineer at LogiQ Dreams LLP company, Kozhikode, India

December 2020 — June 2022

- AI & Web Development

- Experienced data science engineering focusing on identifying electrical appliances using Deep Learning techniques.
- Proficient in data pre-processing, feature extraction, and model training using Python and various machine learning libraries such as sci-kit-learn and TensorFlow.
- Developed and deployed models for identifying electrical appliances based on their power consumption and other features using techniques such as decision trees, random forests, and neural networks.
- Conducted extensive data analysis to identify patterns and correlations in electrical appliance usage, leading to insights that can be used for energy efficiency and cost savings.
- Collaborated with cross-functional teams, including product development, engineering, and business development, to translate insights from data analysis into actionable business strategies.
- Experience in data collection and pre-processing using IoT sensors and other data collection methods.

INTERNSHIP

Software Intern at PSquare Groups company, Andhra Pradesh, India

April 2018 — May 2018

Skills Earned: HTML, CSS, JS, PHP, SQL And Software Development Life Cycle.

Web Developer

- Proficient in web development technologies such as HTML, CSS, JavaScript, and PHP.
- Experienced in developing and maintaining websites and web applications, including database design and development using SQL.
- Familiar with version control systems like Git for code management and has worked on both front-end and back-end development. Collaborated with cross-functional teams to deliver high-quality web applications.

EDUCATION

Bachelor of Technology (BTech) in Computer science engineering, Affiliated JNTUH. Hyderabad, India

April 2015 — 2019

Projects:

- **App Development:** A College Management System app is a software application that automates and streamlines administrative tasks in a college or university, such as student record keeping. It provides a centralized platform for faculty, staff, and students to access and manage academic and administrative information.
- **Web Application:** An Online Examination system is a software that facilitates the creation, delivery, and grading of exams over the internet, providing remote access for students to take exams from anywhere at any time.

PROJECTS

Created an end-end life cycle of ML & DL projects. Developed web applications with system design and latest technologies.

Tools & Frameworks: React JS, Django, Mongo, and Data Science projects.

- **LIC Virtual Agent:** Engineered a licensed virtual agent specializing in insurance, leveraging automated web scraping to extract plan data. Devised personalized policy recommendations by harnessing user-specific information, showcasing proficiency in data-driven solutions for optimal customer interactions. [Know More](#)
- **Machine Learning Models:** Using different data sets from various sources created a GitHub repository to contribute knowledge on various Machine Learning models with a data analysis and documentation. [Know More](#)

SKILLS

Technical Skills

- **Programming Languages:** Python, Java
- **Big Data:** PySpark, Hive
- **Databases:** MySQL, MS SQL, MongoDB
- **Data Analysis:** SQL, Pandas, NumPy, Matplotlib, Seaborn, Power BI
- **Cloud Platforms & Version control:** AWS, Azure, GitHub, Git, Bitbucket.
- **Front-end Development:** React JS, HTML, CSS, JS

Data Skills

Data Manipulation, Data Visualization, Data Governance, Hypothesis Testing, Predictive Analysis, Prescriptive Analysis, Data Mining, Supervised & Unsupervised Machine Learning, Time Series & Forecasting Analysis.

CERTIFICATIONS

- **NLP:** Certified in Natural Language Processing (NLP) through completion of a comprehensive course on Udemy, demonstrating expertise in language understanding and processing techniques. [Certificate](#)
- **Generative AI:** Successfully completed Generative AI coursework, showcasing proficiency in advanced artificial intelligence techniques. [Certificate](#)
- **Java:** Completed java developer course from Udemy. [Certificate](#)
- **UI Path Automation:** Certified in UI path automation. Developed an application by automating the search for tickets by bus, trains and flights websites. [Certificate](#)
- **Salesforce:** Certified in Business Administration specialist in salesforce. [Certificate](#)
