

Bharadwaj I V V S

AI & Data Science Engineer

+91 9666033443 | bharadwjnamahanthi@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI & Data Science Engineer with 5+ years of experience across AI agent engineering, cloud infrastructure, and full-stack development. Skilled in building production-grade AI agents on AWS Bedrock, architecting multi-server MCP integrations, and delivering the full lifecycle from data collection to business-ready insights.

TECHNICAL SKILLS

Languages & Frameworks: Python, Typescript, FastAPI, Django, Flask

AI & LLMs: NLP, Claude, LLMs, AI Agents, Function Calling, MCP (Model Context Protocol), RAG

Databases & Tools: SQL, MongoDB, Docker, Git, Kiro AI, Claude

Cloud & DevOps: AWS, GCP, Docker, Git, GitHub Actions, Nginx, Linux

Core Concepts: Prompt Engineering, Workflow Automation, OpenCV, OCR

PROFESSIONAL EXPERIENCE

Data Science Engineer

Genpact 📍 Telangana, India

📅 Jul 2022 – Present

- **Automated enterprise incident response** by developing production-grade AI agents on AWS Bedrock using Claude Sonnet 4.6 and architecting multi-server MCP solutions connecting Splunk, Datadog, and Kubernetes clusters for unified observability and intelligent incident response.
- **Built scalable APIs** for real-time data collection and automated health checks, enabling continuous and reliable system monitoring.
- **Designed and deployed a supply chain forecasting application** using predictive models integrated with AWS cloud infrastructure, improving forecast precision and reducing inventory discrepancies by **30–40%**.
- **Automated key stages of the end-to-end purchase order workflow**, automating **40% of the process** and reducing manual workload.
- **Optimized data pipelines** for real-time insights, reducing data-to-report cycle times and enabling faster, better-informed stakeholder decisions.
- **Developed a marketing mix model** using Random Forest and regression analysis and designed an interactive dashboard that enabled non-technical stakeholders to run real-time simulations, improving marketing campaign ROI by **15%** and supporting data-driven decisions.

Junior Data Science Engineer

LogiQ Dreams 📍 Kerala, India

📅 Dec 2020 - Jun 2022

- **Built and optimized household appliance classification models** using Python, scikit-learn, and TensorFlow, applying refined feature extraction techniques to sensor data and achieving **78% classification accuracy**.
- **Analyzed power consumption patterns** to identify energy-efficiency opportunities, delivering actionable insights that supported cost-saving decisions.
- **Collaborated with engineering and business teams** to modernize energy monitoring by deploying AI-driven solutions using IoT sensors, enabling **real-time, data-driven energy tracking** across deployments.

Software Intern

PSQUARE Groups 📍 Visakhapatnam, India

📅 Apr 2018 - May 2018

- **Developed and maintained a web application** using PHP, SQL, HTML, CSS, and JavaScript, delivering a stable and functional solution for the team.
- **Designed database structures** for a web-based application, improving backend performance and supporting efficient data management.

EDUCATION

Bachelor of Technology, Computer Science & Engineering

Swarna Bharathi Institute of Science & Technology

📍 Khammam, India 📅 2015 - 2019
